Systems of Care

# *Systems of Care Issues*

- No identified health care provider
- No identified organizational structure for care
- High users of non-traditional sources of care
- Rights and responsibilities change after age 18
- Insurance system highly dependent upon SES and/or college-enrollment status

# Health Care Utilization

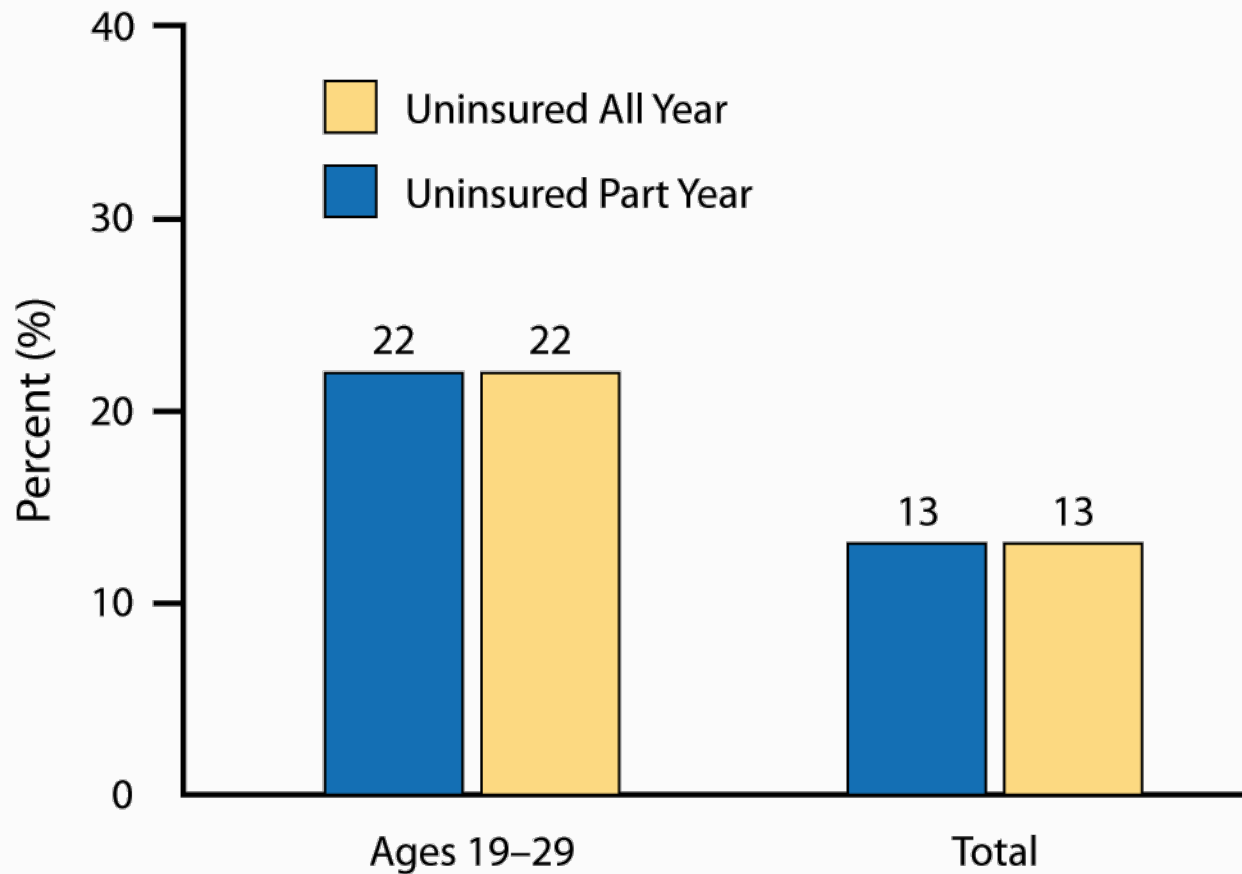

- Among young people, the leading reasons for using health care:
  - **Males:** trauma-related disorders, mental health disorders, asthma/respiratory conditions, and skin disorders
  - **Females:** pregnancy-related/live birth and reproductive health, trauma-related disorders, asthma/respiratory conditions, and mental health disorders

# *Insurance*

- One-third of all uninsured are young adults (ages 19–29)
- Rates of uninsured have increased and are projected to continue increasing for our young adult population

# Uninsured

Percent Uninsured by Age Group and Length of Time Uninsured, 2000

Adapted by CTLT from Commonwealth, 2003.

# Uninsured

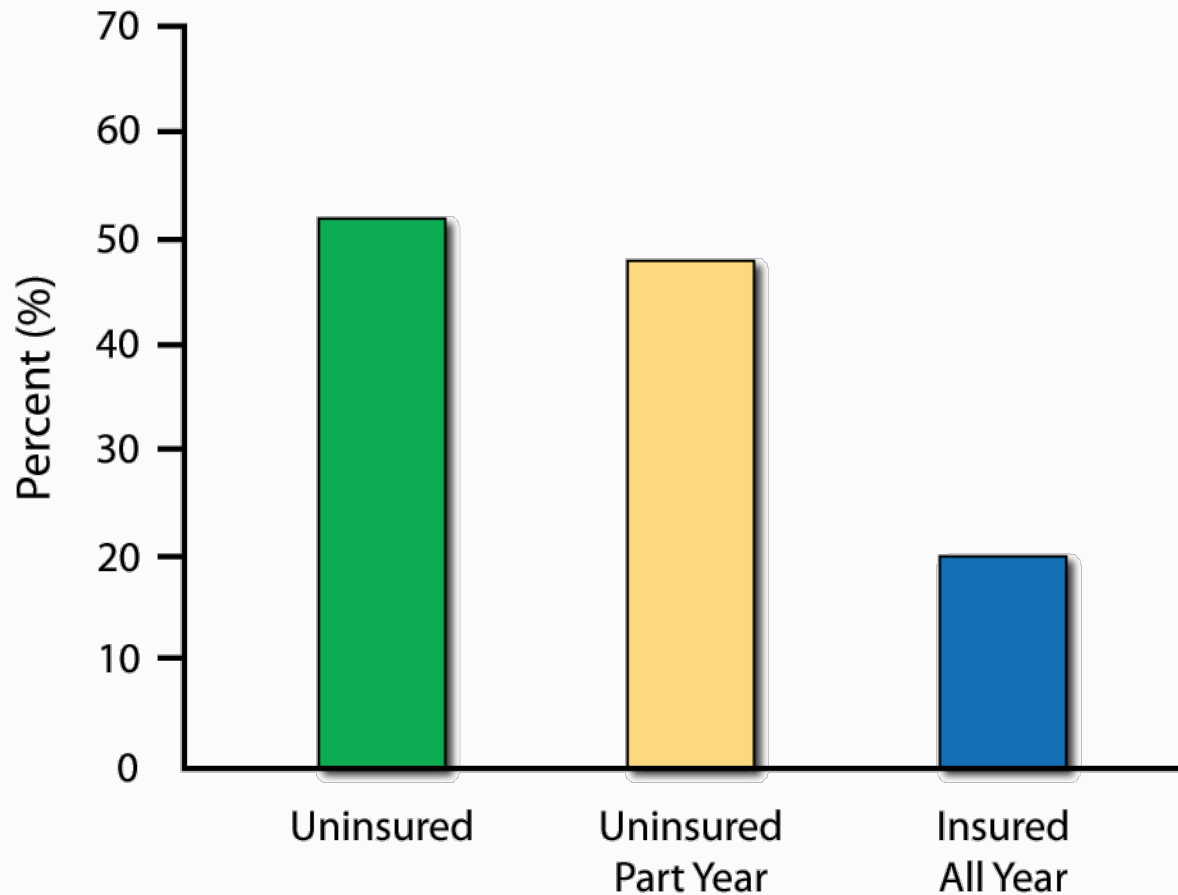

## Percent Uninsured, Children, and Young Adults by Poverty Level, 2001

Percent Uninsured	Children 18 and Under	Young Adults 19–29
Total	12%	28%
< 100% FPL	22%	52%
100%-199% FPL	17%	39%
≥ 200% FPL	7%	15%

*FPL = federal poverty level*

# Health Access

Health Access Problem Due to Cost by Insurance Status, Ages 19–29, 2001

Adapted by CTLT from Commonwealth, 2003
